Bloques en transición

Bloques en transición (Blocks in transition) is an experimental project that was created with the aim of **accompanying several blocks** of flats in the district of **Puente de Vallecas** in the **implementation of practical actions that simultaneously save money, improve the quality of life and reduce the environmental impact** of the homeowners associations.

Through interventions in the buildings and changes in lifestyles, the aim is to achieve comprehensive improvements in the functioning of the blocks in order to move towards what would be the ideal prototype of a 21st century community.

Just Transition Office

To promote community action at neighbourhood level, we have a **Just Transition Office**, located in the **Palomeras Bajas Neighbourhood Association**. The office is a place to go **to receive information and advice** and, in turn, **is responsible for organising awareness-raising activities** and promoting, in a participatory way, actions aimed at moving together towards more sustainable and fairer ecological and social models.

**OPENING HOURS
OF THE OFFICE:
TUESDAY AND THURSDAY
17-20H**

Information and advice

- Communication materials
- Dossier and repository of general information on grants and subsidies
- Database to aggregate demands and suggestions
- Interactive map of just transition actions

Awareness raising

- Workshops in educational centres, PTAs, senior citizens' centres, social centres...
- Presentations or round tables of experiences
- Actions in neighbourhood meetings within the association
- Communication: video pills, social networks, web...

Monitoring of actions in the blocks

- Catalogue of actions for just transition
- Specific training for homeowners associations
- Accompaniment and facilitation of community processes

Dynamisation, actions and community intervention

- Workshops open to the general public
- Specialist's day: where we will have the presence of advisors specialised in the project's themes
- Open and free workshops on the main lines of action of the project
- Meetings with public administration and key agents of the territory
- Dissemination and support to the activities of Palomeras Bajas Neighbourhood Association and other collaborating entities
- Newsletter and activities
